“With all the great things that CABA is doing for my business, they can count on my support from now to the end of time! Of all the affiliations we have, our membership in CABA has proven to be the most beneficial.”

Richard Perkins, CEO, Property Control Systems Ltd.

CABA RESEARCH PROGRAM

For more information about CABA Research opportunities and research services, please contact the CABA Research Department and direct your inquires to:

John Hall, CABA Research Director
hall@caba.org
613.686.1814 X227

Benefits of the CABA Research Program are:

- Reduced cost of research by working with other industry leaders in a collaborative research environment.
- Completely formatted research reports that are actionable business tools.
- Reduced workload for participating companies.
- Collaborative setting without antitrust issues.
- The need for legal work is reduced.
- Organizations direct research objectives.

The CABA Research Program offers a range of technical and advisory research service options for all collaborative research participants. CABA has developed new fee-structured

optional research services for its members:

- Available for studies involving 3+ member participant organizations.
- Tailored to member research project development needs and requirements.
- Members may select any individual research service, bundle various services at discounted rates, or receive various services for no charge when bundled.
- Customized services can be provided.
